- Nordstrom, Saks Fifth Avenue, Macy's, JC Penny, etc

DADELAND

- 1 Santa Clara Station
- 2 Civic Center Metrorail Station
- 3 River Landing Miami
- 4 Culmer Station

ABOUT MetroConnect^{AV}.

What is an Autonomous Vehicle (AV)?

A self-driving car does not require a human driver to operate. It uses a combination of sensor, image, and mapping technologies to travel and respond in real-time to its environment.

How do I know it's safe?

All our self-driving cars have been tested extensively, and a human operator is always behind the wheel monitoring the vehicle to ensure a safe journey.

How do self-driving vehicles work?

1. **Sensors & image technologies.** A combination of radar, laser light pulses, cameras, and ultrasonic sensors creates a 3D model of the vehicle's surroundings so it can safely navigate objects near and far.
2. **Continuous map building.** The vehicle builds and adjusts maps to place itself within its surroundings.
3. **Smart routes.** The car's computer calculates both a long-range plan & short-range adjustments to navigate obstacles, change lanes, and get you to your destination safely.
4. **Object recognition.** Cameras & sensor technologies recognize objects and the car's computer predicts their behavior. Plus, self-driving cars communicate with each other via a wireless connection to alert each other of obstacles and adjust paths.

Are Wheelchair Accessible Vehicles (WAVs) available?

Yes! Let us know you need a WAV by toggling the wheelchair icon in the app:

- Tap the menu in the upper left corner of the screen.
- Tap your name.
- Tap **Special Settings**, then turn on **Wheelchair Accessibility**.

Will there be a driver onboard?

The vehicles are self-driving, but there will be an autonomous vehicle operator onboard at all times to ensure safe operation of the vehicle and aid passengers as needed.

PRICE

All rides are totally **FREE**.

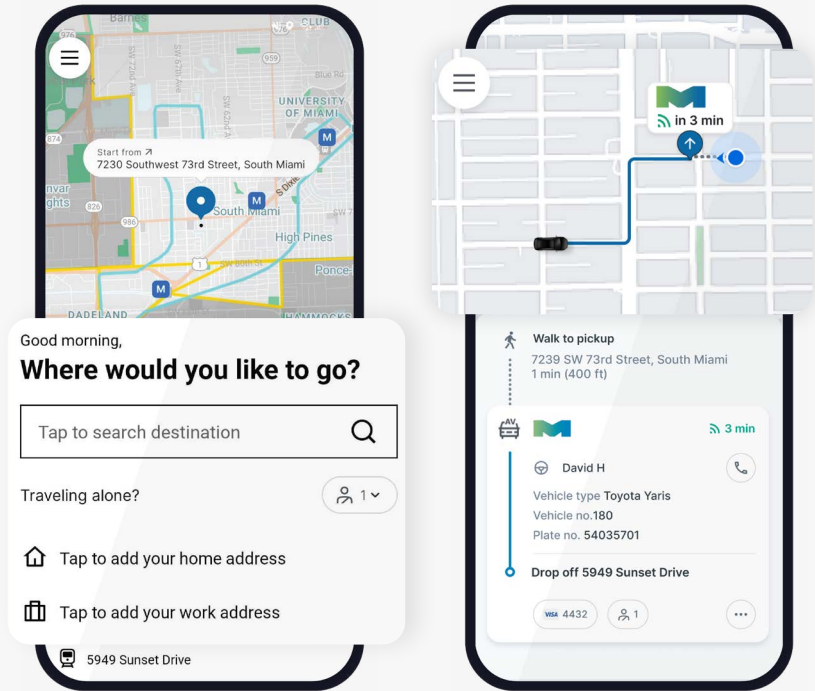

SERVICE LOCATION

Dadeland North, Dadeland South, and Civic Center.

SERVICE HOURS

Monday-Friday,
6:30am - 7pm

HOW TO RIDE.

1. Create an account.

Download the **MetroConnect** app from the **App Store** or **Google Play Store** and follow the simple signup steps.

2. Book a ride.

Enter your pickup and dropoff addresses and choose the ride that works best for you. The AV zone in the Dadeland area will be highlighted in blue, and all self-driving options will be clearly marked in the app with an AV icon — so you can choose if you'd like a MetroConnect^{AV} ride or not.

3. Meet your vehicle.

Check the app to see exactly when and where to meet the vehicle, which may be a short walk from the address you gave us.

4. Scan the QR code.

Scan the code located inside the vehicle to start your ride.
