

## How to Install AdoptOpenJDK on MacOS

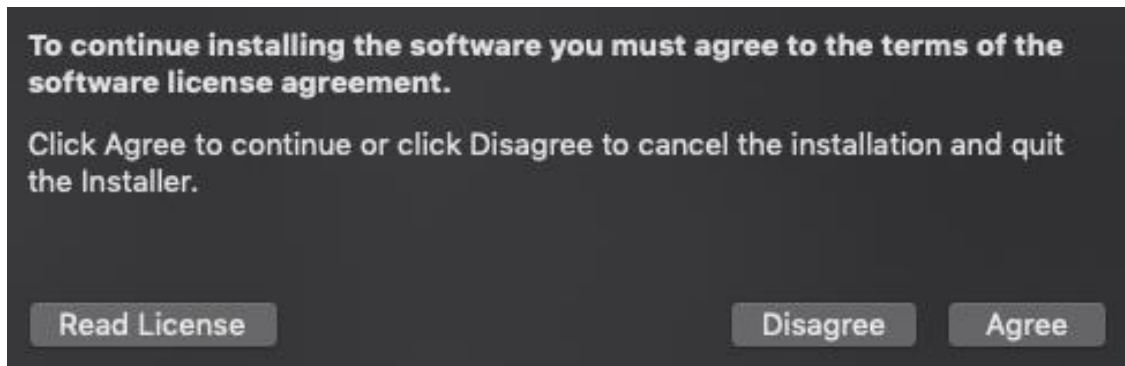

1. Visit <https://adoptopenjdk.net>.
2. Under “Choose a version” select OpenJDK 12 and click the **Latest Release** button.
3. The AdoptOpenJDK pkg file will be downloaded to your default downloads location. Navigate to the file and Double click the pkg file to open it.
4. Click **Continue** to begin the installation.

5. Click **Continue** at the License Agreement screen to continue.

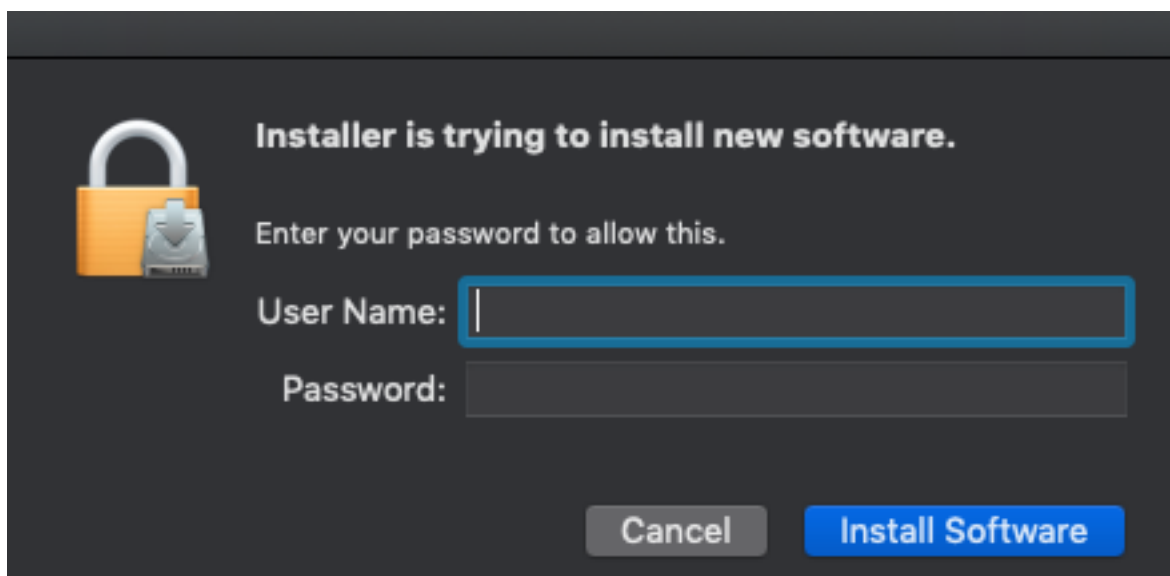

6. Click **Agree** to continue with the installation.

7. Click **Install** to perform installation of the software.

8. If prompted, enter your administrator account password to continue and click **Install Software**.

9. The software has finished installing. Click **Close**.
