This study aims to better understand the role of music in multimedia. If you decide to participate in this study, you will be asked to listen to music and/or watch a short film and then describe what you saw and/or heard. We will also be asking you to fill out a form asking information, like your gender and music preference, and to fill out short surveys that focus on what you think and feel. The session will be at the UX Lab in the Wolfson Building. Participation in this study is completely voluntary and anonymous.
