

Interdisciplinary Health Communication

TRULY INTERDISCIPLINARY: Inviting students, residents, faculty members, administrators, and staff

Fall Semester 2021, Mondays 3:40-6:10 PM
Don Soffer Clinical Research Center--Classroom 989

The focus of this graduate-level, skills-based course, will provide you with 21st century communication tools. Students from different disciplines come together to create conference presentation materials, infographics, public service announcements, and other projects after receiving training from multimedia experts.

Contact Professor: Dr. James M. Shultz: jshultz1@med.miami.edu

Health communication is a critical tool for protecting and improving the health of people and their communities and is most effective when developed collaboratively using expertise from many disciplines.

The focus of this graduate course is the development of written, oral, and multi-media communication skills that will enable students to effectively communicate concepts and evidence-based scientific findings to diverse communities and professionals in health and other fields.
