

Mentra

A neurodiversity employment platform

Tapping into the potential of neurodivergent college students and helping them find employment success

What is Mentra?

Mentra is a job search platform specially designed for neurodivergent job seekers with autism, ADHD, dyslexia, and other neurological differences. Mentra addresses the barriers these job seekers sometimes face as a result of their cognitive differences during the recruitment, application, and interview processes

How does Mentra work for neurodivergent job seekers?

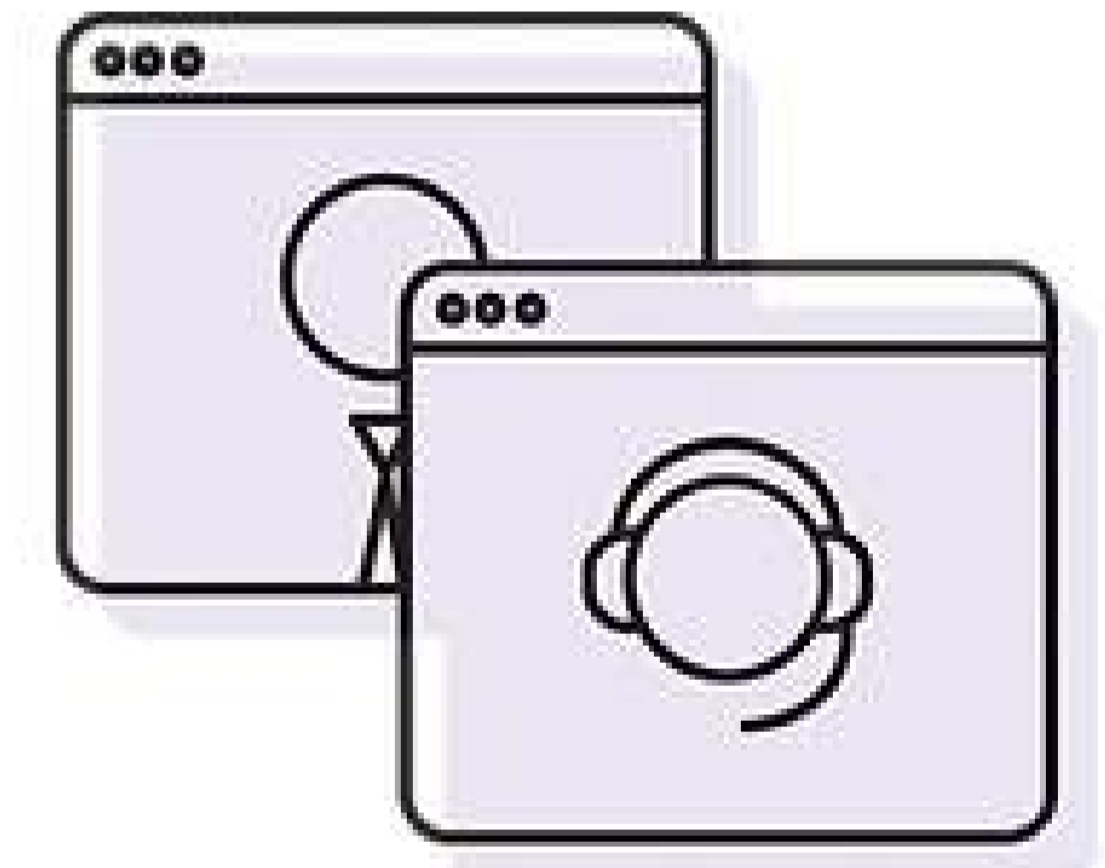

Candidates sign up and complete a 30-45 minute onboarding process

A Candidate Profile is instantly generated, highlighting natural talents and skills

Candidates are matched with jobs that meet their individual needs

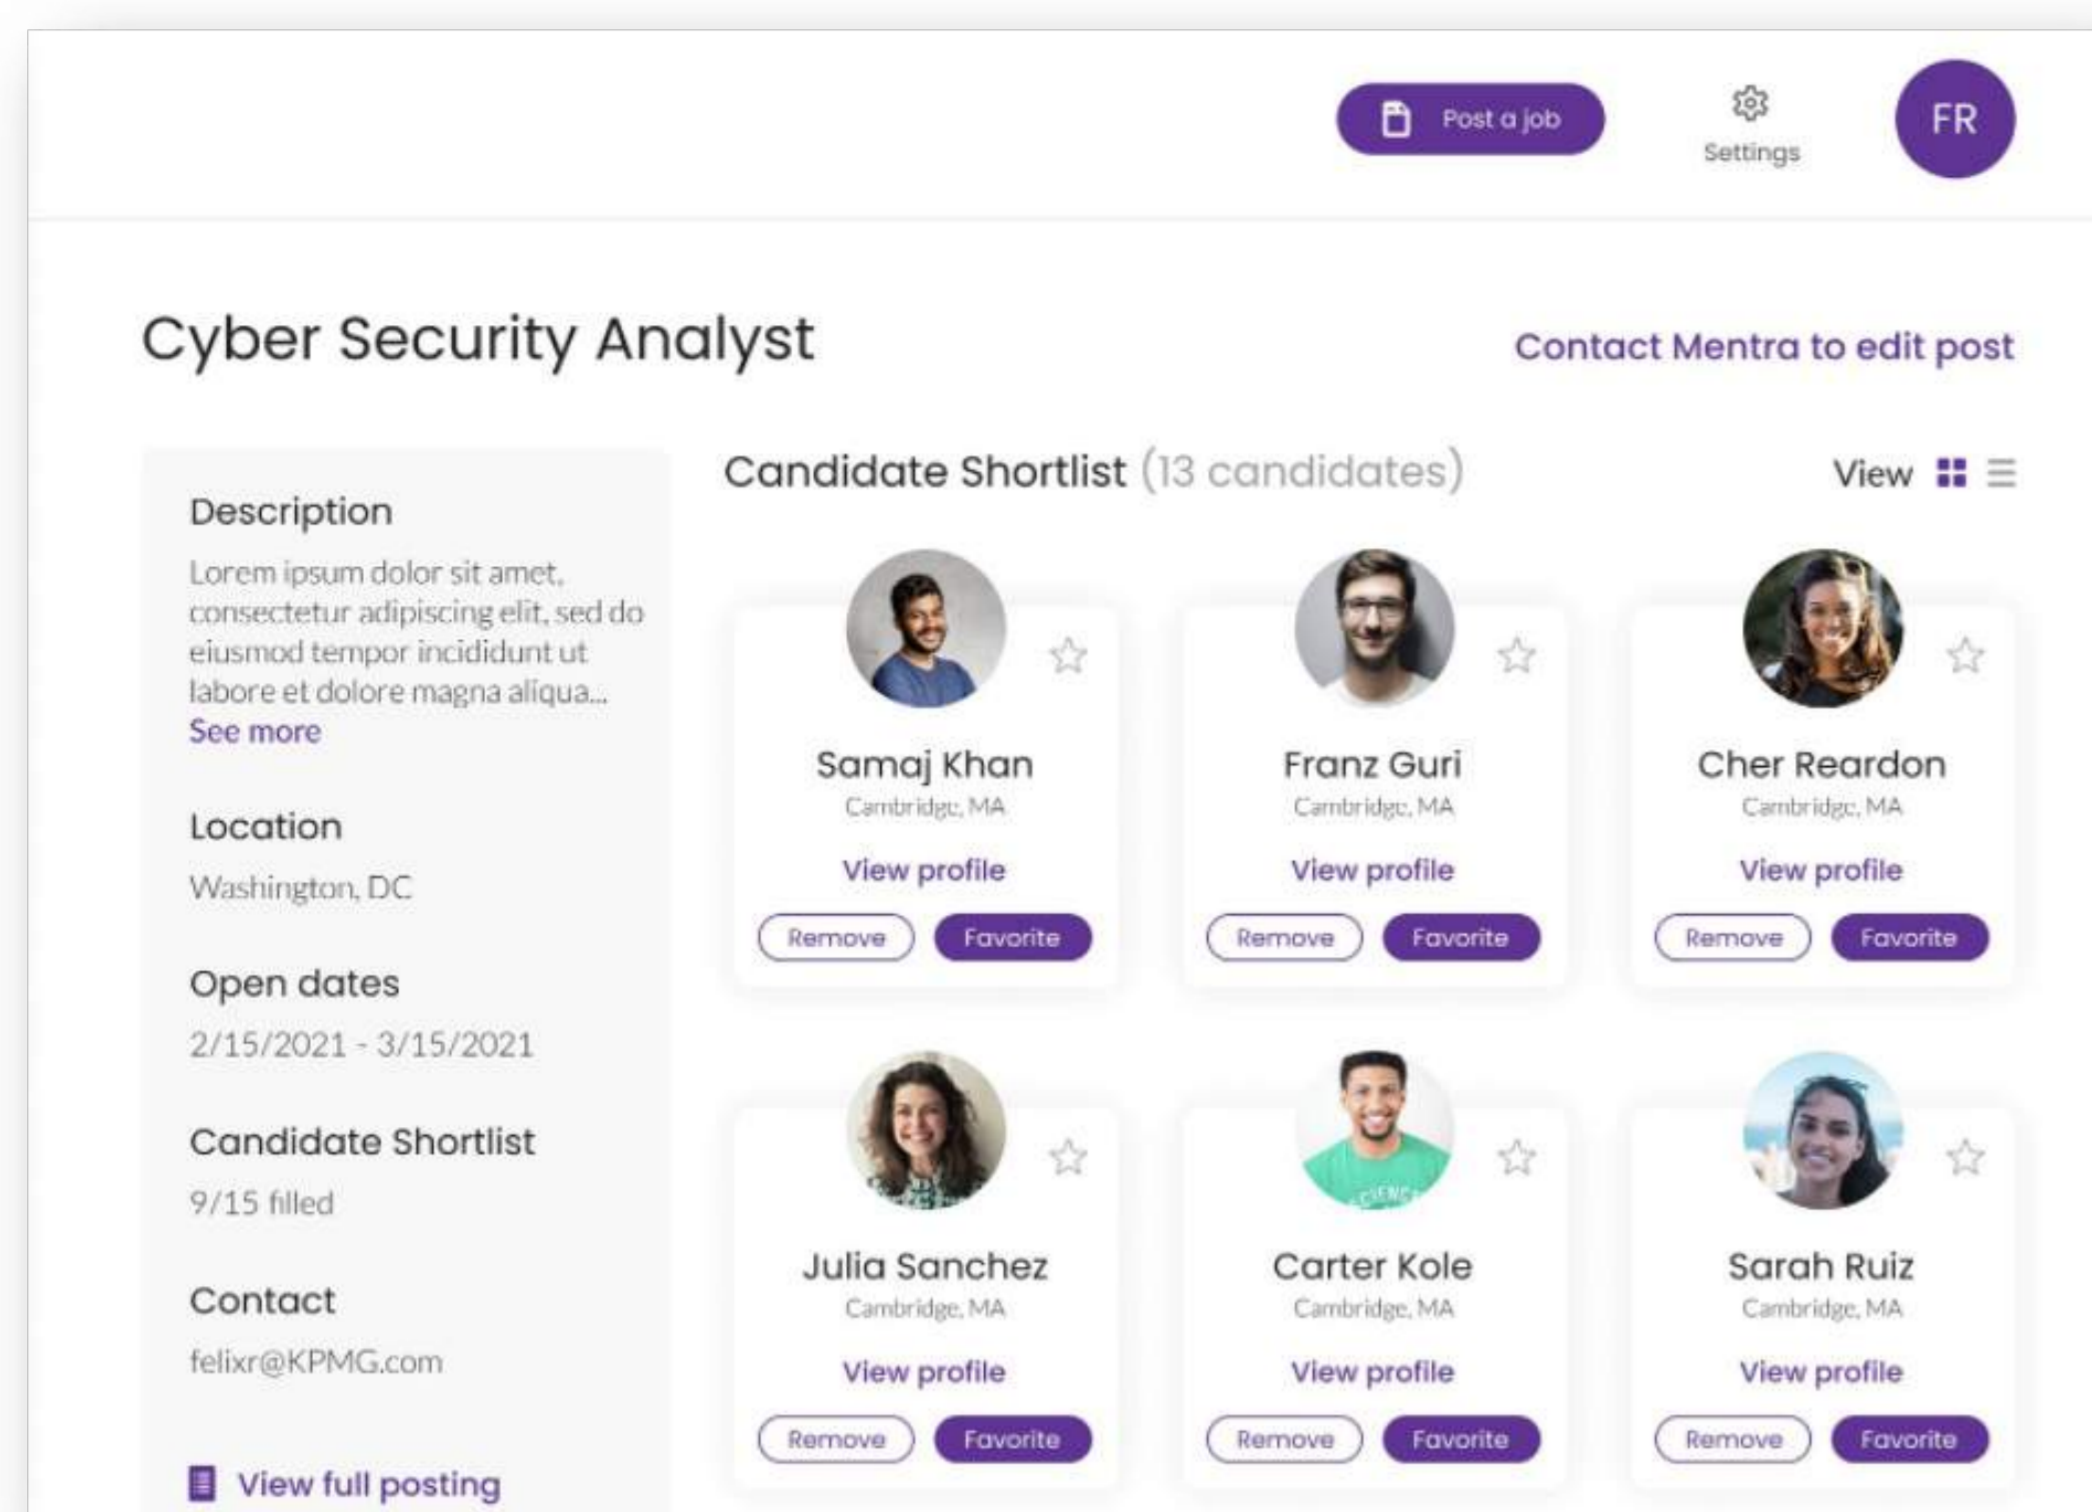

Mentra provides mentorship & guidance to support job readiness

With one job application - access to hundreds of jobs

Mentra takes some stress out of the job search for candidates by automatically matching their Candidate Profile to jobs that most align with their strengths and needs.

How does Mentra work for employers?

Mentra provides mentorship & guidance to employers on the platform to support their understanding of neurodiversity and readiness to support the neurodivergent individuals they hire to ensure success.

Next Steps:

We encourage our neurodivergent students interested in identifying employment opportunities with companies specifically pursuing neurodiverse talent to sign up and create their Candidate Profile.

Find your school's sign up link (www.mentra.me/university-council)

1. Students can complete the sign up form
2. Follow prompts to begin completing your Candidate Profile
3. Check back in with Mentra regularly to view recommended jobs

Optional additional steps:

1. Attend optional virtual "office hours" for help completing your Candidate Profile
2. Receive 1-1 support from Mentra to add a video resume and work samples to your profile

Begin "matching" with internships and jobs!
